Art Unit: 3731

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112: 1.

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. Claims 52-55 and 62 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The limitation as claimed such as "the capture ring having an aperture greater than the firat diameter but smaller than the second diameter" and the method of "retracting the guide wire causes the distal stop abut against the filter element" are contain subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

4. Claims 51, 56-61, and 63 are rejected under 35 U.S.C. 102(e) as being anticipated by Ladd (U.S. 6,059,814).

As to claims 51, 59, and 60, Ladd discloses in figure 1, a stop (38) disposed on the distal region of the guide wire (28); a filter sac (40) connected to a capture ring (44), wherein the capture ring (44) disposed for translation on the guide wire (28) (see col. 5, lines 57-59); wherein the stop (38) is limiting the translation of the capture ring (44) in a distal direction (see col. 6, line 20-21); wherein the filter comprising a self-expanding strut (46); and wherein the rotation of the filter or distal translation of the guide wire (28) relative to the capture ring (44) does not displace the filter sac (40).

As to claims 56-58, 61, and 63, Ladd discloses in figure 1 and (col. 6, lines 9-65), the method of providing a stop (38) disposed on the distal region of the guide wire (28); a filter sac (40) connected to a capture ring (44), wherein the capture ring (44) disposed for translation on the guide wire (28) (see col. 5, lines 57-59); wherein the stop (38) is limiting the translation of the capture ring (44) in a distal direction (see col. 6, line 20-21); wherein the filter comprising a self-expanding strut (46); wherein the rotation of the filter or distal translation of the guide wire (28) relative to the capture ring (44) does not displace the filter sac (40); and further providing a delivery sheath (or catheter) (18) for compressing the filter (40) to a contracted state.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kevin T. Truong whose telephone number is 703-308-
